Portfolio: ved-portfolio-nine.vercel.app

PROFESSIONAL SUMMARY

Frontend & UI/UX specialist with 3 years of experience turning complex Figma designs into pixel-perfect, high-performance interfaces using React.js and Next.js. Known for owning the full frontend lifecycle: component architecture, responsive and cross-browser builds, and performance tuning, while consistently cutting design-to-development handoff time. Also builds interactive, motion-rich web experiences with Three.js, custom GLSL shaders, particle systems and GSAP. Comfortable working directly with UI/API contracts defined by backend teams, with deep focus on the experience layer: interaction, accessibility and visual craft.

PROFESSIONAL EXPERIENCE

Optisoft Business Solutions Pvt. Ltd. - Jaipur, RJ

Frontend Developer

Feb 2024 - Present

- Shipped 30+ production features in React.js and Next.js, architecting reusable, modular components that cut duplicate code across projects and sped up delivery.
- Converted Figma designs into pixel-perfect, responsive, cross-browser interfaces, reducing design-to-dev handoff revisions by 76%.
- Improved page load time by ~80% through component rendering optimization and refined state management.
- Upheld code quality and accessibility standards via modular architecture, peer code reviews and Git-based workflows across a 4-developer team.

Frontend Developer Intern

Nov 2023 - Feb 2024

- Built frontend features for client-facing applications using React.js, HTML, CSS and JavaScript under senior developer mentorship.
- Converted Figma mockups into responsive, interactive pages, maintaining consistent UI across 6+ client projects.
- Implemented form validation, conditional rendering and interactive UI states to raise usability.
- Diagnosed and resolved 40+ UI bugs, strengthening cross-device and cross-browser stability.

DEVELOPMENT PROJECTS

Personal Portfolio - Creative Web Experience | Next.js, TypeScript, Three.js, GLSL, GSAP, Lenis

- Designed and built a motion-first portfolio: GSAP ScrollTrigger timelines, pinned horizontal sections, SplitText reveals, canvas image-sequence animations and Lenis smooth scrolling.
- Wrote custom GLSL shaders in Three.js: a WebGL fluid simulation that reveals the hero video, an instanced grass field swaying in the wind, and a cursor-following lens distortion post-process.
- Built a procedural 3D contact scene with GPU particle systems (fireflies, glowing falling petals), a bloom post-processing pass, day/night lighting, a Draco-compressed GLTF model and Web Audio sound.
- Cut home page weight by ~78% with lazy-loaded videos, AVIF images, purged CSS and self-hosted fonts; contact form sends branded emails through a Next.js API route.

AthLnk - Athlete Recruitment Platform | Next.js, TypeScript, Aceternity UI, Tailwind CSS

- Owned frontend development end to end: athlete profile pages, search and filter UI, agency and university pages, and deals management, building 100+ reusable components and improving performance by 48%.

Live: athlnk.com

Foreward Golf - Golf Coaching Website | *React.js, Bootstrap, Swiper.js*

- Built a responsive marketing site with an integrated booking/inquiry flow, lifting inquiry conversions by 30% and load time by 86%.

Live: foreward.golf

Nursing Handoff - AI-Powered Clinical Handoff Platform (Freelance) | *React.js, TypeScript, Terra UI, React Query, Socket.IO*

- Built the frontend for a healthcare handoff software integrated with Cerner/Oracle Health's EHR, displaying AI-generated shift summaries and an embedded AI chat assistant.
- Handled API integration for patient summary data, including response parsing, version history and real-time update diffing.
- Built for merge into a Spring Boot (Java) backend on the client side.

Clear Place - Brand Marketing & Establishment Platform | *React.js, Bootstrap*

- Built the responsive frontend for an all-in-one marketing platform (FlexLinks, dynamic QR codes, FlexPages, event management, social scheduling, BrandKit, campaign analytics and CRM), unifying 40+ modules in a single dashboard.

Live: clear.place

GreenFrog Cleaning - Service Booking Website | *React.js, Bootstrap, Swiper.js*

- Built a mobile-first frontend for service discovery and booking, supporting 90% mobile traffic and improving booking-flow completion by 48%.

SKILLS

Frameworks / Languages: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Creative Development / 3D: Three.js, WebGL, GLSL shaders, particle systems, instanced rendering, post-processing (bloom), GLTF/Draco models, canvas image sequences

Motion: GSAP (ScrollTrigger, SplitText), Lenis smooth scroll, Web Audio API

UI Libraries: Tailwind CSS, Bootstrap, Shadcn UI, Material UI, Aceternity UI, DaisyUI

Design Tools: Figma, Zeplin, Adobe Photoshop, Canva

Platforms: WordPress (Elementor), Shopify, Vercel

Practices: Responsive Design, Cross-Browser Compatibility, Component-Based Architecture, Performance Optimization, Accessibility, Agile Collaboration

Version Control: Git, GitHub, GitHub Desktop

EDUCATION

University of Rajasthan - Jaipur, RJ

Bachelor of Computer Applications (BCA) - Graduated: May 2024
